

Goals of HU-MATHS-IN

The primary aim of the network is to let the members' mathematics achievements visible done for industry and innovations and thus promote their participation in projects supported within Horizon 2020. To achieve these goals, the network participates as a member of the EU-MATHS-IN, the European Service Network for Mathematics in Industry and Innovations. As long term goal, the network will provide industry with an infrastructure for finding a suitable partner among its members who satisfy their needs in research and development.

For more details see the Declaration Document [here](#). See also the files in [this folder](#).
